Subject: Re: Crandall Canyon Shaft Water Analysis Final Report

Dennis,

Thank you for the rest of the lab data. As a follow up from our meeting on December 7th, I am requesting that you provide a written account of the events as you described them. This can be either an e-mail or letter to document the events and demonstrate an "Upset" condition of your existing UPDES Permit (Part III.H.2). Please contact me if you have any questions. Thank you for the prompt notifications and actions thus far. I look forward to hearing from you and resolving this matter.

Best Regards,

Jeff Studenka

For whatever reason the original message did not reach some of those it was sent to. This will be a duplicate for some of you.

Gentlemen,

I have attached the final results of the SGS water analysis on the water samples taken from the Crandall Canyon #2 Shaft on November 30th and December 1, 2006. If you have any questions or comments please give me a call at 435-472-4737. As you are likely aware, we have decided to put a temporary wire mesh cover over the shaft and a sturdy fence around the perimeter and wait until spring to take any further action.

Regards,
Dennis
