---

Richard,

How are things? Long time no see. Hope things are going well.

Here's a link to the CHIA's that we have on our web-site: <http://ogm.utah.gov/fs/chias.php>. Let me know if this doesn't work for you.

Til next time,  
Steve

p.s. I don't know when the last time was you perused our web-site, but it's had a few handy features thrown in as of late. For example, access to all of our permit files has become much more user friendly.  
<http://ogm.utah.gov/fs/filesbypermitinfo.php>.

You can filter by permit number, year, type of document (internal/incoming/outgoing etc). It's much slicker than it used to be. You still have to enter "*ogmguest*" as a username and password, but only after you've clicked on a particular file to view. There are folks that work here who aren't aware of the changes so I just thought I'd pass them along.

p.s.s. Speaking of electronic documents, there's been discussion for years around here regarding electronic permitting. They've implemented an electronic permitting system on the Oil and Gas side of the building and now there's renewed interest in exploring electronic permitting on the Coal side. If you have a few minutes, I'd be curious to know what your general take is on electronic permitting. Good idea? Bad idea? Indifferent? Issues?

Steve:

We need to obtain a copy of the Willow Creek/Price River CHIA for work that we are performing for Plateau. Can I get an electron copy of that document? If not, how do I go about getting a hard copy?

Thanks for your help.

Rich White
