1. Permits, Change, Transfer, Renewal, Sale

The Willow Creek Mine has received Phase II bond release in the summer of 2012.

2. Signs and Markers

Identification signs are at the gates to the property and roadway to the old preparation plant. The information met the minimum requirements of the R645 Coal Rules.

3. Topsoil

All topsoil was used in reclamation. Vegetation is growing on the area which was disturb..

4.a Hydrologic Balance: Diversions

Diversions were open and in good condition. There were no signs of erosion within the diversions. Some vegetation is growing within the diversions.

8. Noncoal Waste

The site was clear of non-coal waste materials. This site should not receive any non-coal waste materials since there is a main gate to access the property.

10. Slides and Other Damage

No slides or damage was noticed during the inspection.

12. Backfilling And Grading

The sites are completely reclaimed. All backfilled material was used. The site should meet AOC standards.

13. Revegetation

This site in my judgment is highly vegetated in the summer.
