Cheryl,

I was in Crandall Canyon yesterday with my contractor (Nielson Construction) going over the work that needs to be done including culvert cleaning, road repair and placing rip rap in the main channel near the fenced shaft site. They are yet unable to give me a date when they will mobilize. They are on a job at the Carbon Power Plant; when they finish this job they will move their equipment and crew to Crandall Canyon. I will keep you up to date.

Regards,
Dennis
