Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

Division representative reviewed the Permittee's required documents. The insurance was up-to-dated in December 2014 with a new copy added to the Division's file as well as the Permittee's. A field inspection was conducted at School House Refuse Pile, Gravel Canyon, Crandall Canyon shaft reclamation, and main facility areas. The Crandall Canyon shaft reclaimed areas appear to be stable with no change in elevation. Vegetation at all sites was clear of noxious weeds and invasive species. The culvert at the base of the School House Refuse Pile was completely open. All ditches and culverts at Crandall Canyon and School House Refuse Pile were in functioning order. The current bond amount is \$489,166 which is enough for any supplemental seeding as required by R645-301. The Permittee has applied for Phase III bond release, Task 4901, currently under review by the Division. No violations were issued.
