Re: Technical Analysis, Canyon Fuel Company, Dugout Canyon Mine, PRO/007/039,  
Folder #3, Carbon County, Utah

Dear Mr. Arnolds:

The Division has completed the technical review of the proposed Dugout Canyon Mining and Reclamation Plan (MRP). The enclosed Technical Analysis (TA), documents the findings that the Division has made to date on the application. You will quickly note under the "findings" sections that a number of deficiencies exist in your application. Please review the TA carefully and make sure you understand the requirements. The deficiencies must be adequately addressed in order for us to complete the permitting action.

In order to keep this project in the review loop, a complete response should be submitted no later than October 3, 1997.

Thank you for your help during the permitting process. If you have any questions, please call me or the appropriate member of my staff.

Sincerely,

A handwritten signature in black ink that reads "Daron R. Haddock".  
Daron R. Haddock  
Permit Supervisor
