RE: Canyon Fuel Company, LLC. - "Dugout" Mine - Application to Incorporate a Small Substation Topsoil Salvage Report

Dear Mr. Haddock:

This in response to the Utah Division of Oil, Gas, & Mining's (UT-DOGGM) June 19, 2003, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application to Incorporate a Small Substation Topsoil Salvage Report has determined that it proposes to add topsoil salvaging information associated with the small substation to Appendix 2-5 to the existing permit for the Dugout mine, Utah State permit C007/039.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal is administrative in nature and does not meet the requirements of 30 CFR § 746.11(a) and 746.18(d). Therefore, since no changes in the recovery of Federal coal is involved, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

Please notify the applicant of our decision on this matter.

OSM's decision does not, however, relieve UT-DOGGM from coordinating the review and approval of the Application to Incorporate a Small Substation Topsoil Salvage Report with other Federal agencies for compliance with other Federal regulations.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

Foster E. Kusy (Acting)
