Subject: Sealing of Wells G-6 & G-9A

Sue,

I left a voice mail message for you today, September 6th informing you that we would be completing the cementing of Well G-6 which was started in 2005. Per your request I have also left a message for Angela. We anticipate completing G-6 within several days. For your information, in order to get cement this year due to the demand, we have been taking trucks on short notice when ever available. The plug and bentonite were placed in the hole last year, but due to weather the cement trucks could not make it to the hole to complete the job in 2005.

The cementing of Well G-9A was completed on August 14th. You will recall you were contacted by telephone on the 10th. Thirty cubic yards of cement were placed in the hole. The plugging of G-9A was completed according to 43 CFR Ch. 11, Subpart 3484.1, (3), found in Attachment 5-2 of our M&RP.

If you have any questions, please contact me at 636-2869.

Thank you, Vicky Miller, Dugout Canyon Mine.
