RE: Canyon Fuel Company, LLC. - "Dugout Canyon" Mine - Application for a Permit Revision, Refuse Pile Access Road, Task ID No. 2577

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) August 23, 2006, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Refuse Pile Access Road, has determined that it proposes to add revised text and plates to the approved permit application package to address paving of the existing refuse pile access road at the Dugout Canyon mine, Utah State permit C/007/039.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Refuse Pile Access Road, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the August 23, 2006, request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.

RECEIVED

SEP 28 2006

DIV. OF OIL, GAS & MINING

Please notify the applicant of our decision on this matter.
