Subject: Culvert UC-1 pix

Layne,

Just got off the phone with Vicky Miller about the UC-6 culvert modification. I asked her if I could get an updated calculations page depicting both of the trash racks installed at the culvert inlet and an updated description. The submitted calc.'s mention the roof bolt rack, but not the other trash rack mounted directly above the inlet.

It's also my understanding that culvert UC-6 will be renamed UC-1 upon the completion and submittal of the Dugout Mine as-builts. The submittal refers to both UC-6 and UC-1. If you could mention something about the name change for clarification purposes, that would be helpful.

I've attached a photo of the culvert from our recent site visit.

Thanks Layne,
Steve
