RE: Canyon Fuel Company, LLC. - "Dugout Canyon" Mine - Application for a Permit Revision, Addition of 480 Acres, Task ID No. 2730

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) January 11, 2007, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Addition of 480 Acres, has determined that it proposes to add 480 acres in the portions of Sections 17, 18 and 21, T.13 S., R. 13 E. of Federal lease U-07064-027821 to the permit area of the Dugout Canyon mine, Utah State permit C/007/039.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal meets the requirements of 30 CFR 746.18(d)(3)(ii). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Addition of 480 Acres, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the January 11, 2007, request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.
