Pam:

I briefly spoke with Vicky this morning about the issue of permitting the degas wells. She indicated she had spoken to you about them in the recent past. To be sure we are all on the same page, it is my understanding she is still trying to collect all of the appropriate baseline data for the roads and pads that are needed as soon as possible. Once the data are collected and the modifications to the permit written, she will submit. Getting the right folks out to do the studies has taken longer than initially anticipated and we unfortunately lost some valuable time due to a few of the recent storms. We will continue to forge ahead and I know this issue has the highest priority on Vicky's agenda.

Thanks,

Chris
