Vicky,

Howdy. Attached are the deficiencies Priscilla identified in the degas amendment (G-18, G-31 and Access Road). If you have any questions about either Priscilla's or my deficiencies, don't hesitate to call us.

I've spoken with Pete about the blowout you had at Pace. We'll be in touch soon about what needs to be done about the situation. Pete told me you already had the road open so that must be a load off everyone's mind given your power problems. You still don't have electricity up there? Good luck with that.

Steve, I will review these and get back to you. I will be on the mountain again today, supervising the clean up of mud and debris. Have a good weekend. Vicky

Vicky,

Sorry to hear about your washout woes in Pace Canyon. The Pace Canyon Facility's design is top notch. Goes to show that Mother Nature can trump anything if she decides to.

Per my previous e-mail, I'm attaching a revised list of hydrologic deficiencies. I went through the document I gave you and cleaned it up considerably. My advice would be to throw away the document I gave you yesterday. The attached document should be easier to follow. You should also throw the other document away as I've added some things to this one that aren't in the former.

Give me a call when things calm down on your end and we can start hashing through this stuff.

Good luck with the road Vicky,

Steve
