The aforementioned amendment has passed it's initial review and can proceed to technical review.

f.y.i.- This amendment was submitted following a request by Steve Demczak during an inspection. There were a number of surface facility features that were not adequately identified/described. The maps that have been submitted have already been reviewed/approved by Mr. Demczak. As such, I'll draft up a conditional approval letter (contingent upon the requisite number of clean copies being submitted) this morning and forward it.

Steve
