Subject: Dugout #3109 (Revisions to Surface Facility Maps)
Place: OGMCOAL

Jim and Suzanne,

As I e-mailed earlier, the aforementioned task has been reviewed and is ready to go. Steve Demczak requested that the surface facility maps for the main Dugout facility and the Pace Canyon Fan site be revised (Plate 5-2 and Plate PC5-2 respectively).

The requested map revisions were brought about when Mr. Demczak was ground-truthing the maps during an inspection and noticed features that needed additional information/identification on the maps.

Mr. Demczak has reviewed the two submitted maps and approved their revisions. As the plate revisions are minor, a technical memo was not produced.

Here is the file path to the conditional approval letter: O:\007039.DUG\DRAFT\WG3109\WG3109_Apprv_Ltr.doc

If you have any questions, let me know.

Steve
