Subject: Initial Completeness Review Rejection of Incidental Boundary Change, Task ID #5212, Canyon Fuel Company, LLC, Dugout Canyon Mine, C/007/0039

Dear Mr. Tatton:

The Division received your application for the above-noted permit change on June 27, 2016. Pursuant to R645-303-221, the Division completed the requisite 15-day Initial Completeness Review (ICR) and denies this application for a technical review.

The submitted application does not include any discussion on what the boundary change entails, nor is there any discussion in any of the chapters that the existing baseline information for hydrology (spring and seep, water monitoring), cultural studies, biological studies, etc. cover the additional area.

As this change affects the permit boundary of the mine, a number of maps (besides the 3 provided) will need to be revised.

If you have any questions, please call Steve Christensen at (801) 538-5350 for further details.

Sincerely,

Daron R. Haddock
Coal Program Manager
