The demonstration test plot refuse characteristics are represented by samples analyzed in 2015, per email from Jay Marshall below.

Subject: refuse sample under test area
To: "priscillaburton@utah.gov" <priscillaburton@utah.gov>

Priscilla:

I spoke with Bill King about the possibility of a refuse sample being taken directly under the area of low cover. He said that there was not a sample taken directly under that area the closest he could come would be a sample in 2015 when the refuse was laid down in that area.

Any other questions please give me a call.

Thanks

Jay
