Re: Extension Granted for Submittal of Engineering Drawing for the Division Order, West Ridge Resources, Inc. West Ridge Mine., ACT/007/041-DO00A, Outgoing File

This Division Order was issued on April 6, 2000 and was initially due on June 6, 2000 (60 days after the issuance). The first extension for submittal of all information for this Division Order was granted until June 23, 2000. The Division received plates showing the current disturbed area boundary and a highwall stability analysis on June 27, 2000. The letter accompanying the June 27, 2000 submittal stated that the engineering drawings, including cross-sections and final reclamation are nearing completion and "are expected to be ready by July 14, 2000 or sooner if possible."

I telephoned you and requested a clearer request for an extension on June 30, 2000 which was faxed to the Division on June 30, 2000. However, this is a Division Order and carries with it more stringent time frames. An extension is granted until July 14, 2000 with the understanding that this will be the final extension for submittal of the engineering cross-sections. A compliance action may need to be taken otherwise.

In the future, please submittal **all** materials together because the Division cannot commence the review until all the information is received.

If you have any questions, please call me.

Sincerely,

for Pamela Grubaugh-Littig
Permit Supervisor
