NOTES TO REVIEWERS:

DIV. OF OIL, GAS & MINING

1) This revision adds SITLA (state) leases ML-47711 and ML-49287 to the WEST RIDGE Mine permit 007/041. This will add 1682.34 acres to the permit area.

2) On March 7, 2005 an Incidental Boundary Change (IBC) application was made to add 50.0 acres of the Penta Creek fee lease to the permit area. This Penta Creek IBC application is explicitly for approval only of the development of the tailgate entries for Panel 7, and explicitly excludes approval of longwall mining of Panel 7 until the results of an on-going seismicity study are available for review by the regulatory agencies (BLM and DOGM). The results of this study will then become the basis upon which full-extraction longwall mining of Panel 7 is either approved or denied. In the IBC application all text changes were shown in red, and are described in the C1/C2 forms dated March 17, 2005.

3) This state lease revision contains all text changes from the Penta Creek IBC application, which are shown in red, exactly as contained in the March 7 submittal.

4) All text changes in this submittal which are in addition to the IBC text, and are specific to inclusion of the state leases, are shown in blue. The changes are described in the C1/C2 forms dated February 22, 2005.

5) Page changes that do not have no red or blue changes are the result of pagination changes.

6) In this submittal the permit area is defined as the presently approved permit area (4382.55 acres), plus the pending Penta Creek IBC area (50.0 acres), plus the pending state leases (1682.34), for a total pending permit area of 6114.89 acres. These areas are clearly shown on Map 1-0
