1. Permits, Change, Transfer, Renewal, Sale

The permittee has not submitted an annual report for 2004.

2. Signs and Markers

The permittee had identification signs at the pump house. The information on the sign met the requirements of the R645 Coal Rules.

3. Topsoil

The topsoil pile was inspected with lush green grasses. The test area will be reclaimed within the next 30 days.

4.a Hydrologic Balance: Diversions

The diversions were spot-checked. The permittee will need to clean out the diversion on the main road and truck turn-around. Sediment has started to collect within the diversion.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment pond was inspected and no hazardous conditions were noticed during the inspection. The upper portion of the sediment pond contained water but is not likely to discharge in the near future.

4.c Hydrologic Balance: Other Sediment Control Measures

The permittee will need to clean out some of the sediment traps along the main road. Sediment has started to build-up behind the silt fences.

8. Noncoal Waste

There was less trash along the roadways. This is an improvement from the past.

18. Support Facilities, Utility Installations

No new support facilities have been constructed since the last inspection.
