Subject: Addition of State Leases ML-47711 and ML-49287, West Ridge Resources, Inc.,
West Ridge Mine, C/007/0041, Task ID #2187, Outgoing File

Dear Mr. Gray:

The Division received an application to add State Leases ML-47711 and ML-49287 to the West Ridge Mine Permit on March 22, 2005. The application has been reviewed by our technical staff and assigned Task ID #2187. The proposed lease areas add 1,682.34 acres to the existing approved permit area of 4,432.55 acres. No new surface disturbance is proposed as a result of the addition.

Before the Division can approve this amendment, the Permittee must provide the information outlined in the attached deficiencies, in accordance with the R645 Coal Mining Rules cited. For clarification or more information, you can contact the Division specialist whose initials are at the end of each deficiency.

pwb	Priscilla Burton	(801) 538-5288
dwd	Dave Darby	(801) 538-5341
smf	Steve Fluke	(801) 538-5259
jch	Joe Helfrich	(801) 538-5290
whw	Wayne Western	(801) 538-5263

Technical Memos prepared by each of the reviewers are available upon request. In order to expedite this process and accommodate West Ridge's schedule to begin development in the new lease areas by August 1, 2005, please respond to the following deficiencies by July 8, 2005.

Sincerely,

D. Wayne Hedberg
Permit Supervisor

an
Enclosure
O:\007041.WR\FINAL\WG2187\Defltr2187.doc

TECHNICAL DEFICIENCIES

R645-301-521.121, The Permittee must show the location of all buildings within 1,000 feet of the permit area. In particular, the cabin and trailer home located within the existing permit area in Spring Canyon near the north boundary of Federal Lease UTU-78562 must be shown. [whw]

R645-301-522, -122, The Permittee must include a copy of Appendix 5-10 and Appendix 5-9. [whw]

R645-301-525.130, The Permittee must include information about the quality and quantity of State Appropriated water supplies within the permit area in the subsidence section of the MRP. If the information is found in other sections of the MRP the Permittee must make references in the subsidence section. [whw]

R645-301-525.480, The Permittee must include a detailed discussion in the subsidence section of the MRP of the methods to be used to replace adversely affected State-appropriated water supplies or to mitigate or remedy any subsidence-related material damage to the land or protected structures. [whw]

R645-301-728.100, -728.200, -728.310, -728.334, -728.340, -728.350, and 728.400, The Permittee needs to update the Probable Hydrologic Consequences (PHC) Determination to include additional baseline hydrologic monitoring of Spring Canyon, Little Spring Canyon, and Bear Canyon. The baseline data is necessary in order for the PHC to make findings on: whether adverse impacts may occur to the hydrologic balance; what impact the proposed coal mining will have on groundwater and surface water availability; and whether the proposed coal mining will result in contamination, diminution or interruption of groundwater, surface water, or State-appropriated water within the proposed permit or adjacent areas. [smf]

R645-100-200, -301-728.100, The Permittee needs to reassess the ephemeral drainage status of Bear and Spring Canyons based on observations from a site visit of the additional lease areas conducted on June 8 and 9, 2005 that revealed that these watersheds appear to contain intermittent drainages and not ephemeral drainages as reported in the existing PHC. The intermittent status of these streams is based on observed flows at the time of the site visit and riparian vegetation supported along the stream channels. In addition, the Bear Canyon and Spring Canyon watersheds are each greater than one square mile, which would qualify them as intermittent streams as defined in **R645-100-200**, Definitions, "Intermittent Streams". [smf]

R645-301-724.100, -731.210, The Permittee needs to update the groundwater monitoring plan to include additional groundwater monitoring in Spring Canyon, Little Spring Canyon, and possibly Bear Canyon. However, the additional groundwater

monitoring should be based on the PHC determination, which has been found deficient by the Division pending, among other things, additional baseline hydrologic information. [smf]

R645-301-724.200, -731.220, The Permittee needs to update the surface-water monitoring plan to include additional surface-water monitoring in Spring Canyon, Little Spring Canyon, and possibly Bear Canyon. However, the additional surface-water monitoring should be based on the PHC determination, which has been found deficient by the Division pending, among other things, additional baseline hydrologic information. [smf]

R645-301-724.100, -724.200, The Permittee needs to update Appendix 7-5 with current water rights information. In particular, water rights 91-4513, 91-4682, and 91-4681, all located within the additional State Leases ML-47711 and ML-49287, should show current ownership by the Utah School Institutional Trust and Lands Administration. All other water right information listed in Appendix 7-5 should be checked for accuracy. [smf]

R645-301-722.300, The Permittee needs to update Plate 7-7, Operational Monitoring Locations, with the additional hydrologic monitoring sites once they have been established. [smf]

R645-301-729, The Permittee needs to address the hydrologic deficiencies listed in this technical memo (Task ID #2187) before the Division can update the Book Cliffs Area III, Cumulative Hydrologic Impact Area with information regarding the additional State Leases ML-47711 and ML-49287. [smf]

R645-301-320, Using map 3-1 as a reference, riparian vegetative communities were noted in Little Spring canyon, Spring canyon and Bear canyon. Map 3-1 needs to be updated to include the referenced riparian communities and more accurately depict the vegetation types in the state lease areas. The south west quarter of section one on map 3-1 includes a pocket of Pinyon/Juniper. Observations during the field visit indicate that this is a stand of Douglas fir timber. Map 3-1 needs to be updated to include this correction. [jch]

R645-301-322.100, There is no surface disturbance associated with this permitting action. The only effects to the riparian habitat would be those from subsidence. As such applicant needs to provide a protection and enhancement plan for the critical and or high value wildlife habitat areas. [jch]

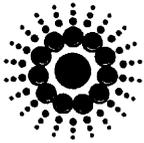

R645-302-263 and R645-301-112.300, Changes to the principal shareholders of Andalex Resources, Inc. listed under R645-301-112.300 are necessary as detailed in correspondence on file with the Division (dated August 26, 2002 and December 18, 2003, attached). The following information must be provided for Andalex Resources, Inc.'s multiple parent companies:

- Ownership or control relationship to the applicant

- Percentage ownership
- Location in the organizational structure
- Addresses of the corporations within organizational structure
- Principal shareholders of all the above corporations.
- Ownership and control information must include officers and directors.
[pwb]

R645-302-263 and R645-301-112.400, Legal and financial information provided in the application must include any coal mining and reclamation operation owned or controlled by either the applicant or by any person who owns or controls the applicant. i.e., Although Genwal Resources was noted on p. 1-7, the percentage ownership by Andalex in this mine operations was not noted and the ownership information for Centennial Mine must be mentioned as well. [pwb]

R645-302-263 and R645-301-113.300, Although Appendix 1-2 includes a listing of all violations received within the last three years prior to the date of this application by Utah mines under the control of Andalex Resources, Inc. Tower Division, the plan must also include any unabated violations or cessation orders written to **affiliated companies** in the United States or alternatively, the Permittee may state in the application that there have been no unabated violations or cessation orders to **affiliated companies** during the three years preceding the date of the current application (March 2004). Re: Ownership and Control Update

**ANDALEX Resources, Inc.
GENWAL Resources, Inc.
WEST RIDGE Resources, Inc.**

Dear Ms. Grubaugh-Littig:

This letter is submitted to provide you with update information concerning the ownership and control of the following:

ANDALEX Resources, Inc.

Mine: Wildcat Loadout
Permit No.: C/007/033

Mine: Centennial
Permit No.: C/007/019

GENWAL Resources, Inc.

Mine: Crandall Canyon
Permit No.: C/015/032

WEST RIDGE Resources, Inc.

Mine: West Ridge
Permit Application No.: C/007/041

DIV. OF OIL, GAS & MINING

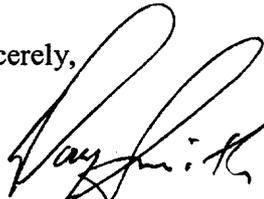

Ms. Pamela Grubaugh-Littig
December 18, 2003
Page 2

Subsequent to our submission of ownership and control materials in August of 2002, a change has occurred in the ownership structure of ANDALEX Resources, Inc. The change relates to one corporate entity in ANDALEX'S ownership chain. In order to reflect this change in ownership, I am enclosing two (2) revised pages for use in connection with each of the permits identified. These pages are identified as page 4 of 8 and page 5 of 8.

There has been no change in the operator/permittee of any of these operations or in the ultimate ownership of either entity. Except as shown in the attachments, there have been no other changes in the information as contained in the materials on file with the Division. We hope this information will allow you to keep you files current.

Please feel free to contact either me or any of the individual operations directly should you have any questions.

Sincerely,

Douglas H. Smith, President

ANDALEX Resources, Inc.

Permit Application No.: C/007/041

RECEIVED

AUG 27 2002

DIVISION OF
OIL, GAS AND MINING

Pamela Grubaugh-Littig
August 26, 2002
Page 2

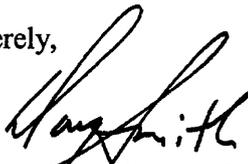

The attached materials are being submitted to the Division on behalf of both ANDALEX and IPA. Subsequent to the most recent filings made with the Division of Oil, Gas & Mining, there have been some minor structural adjustments to the ANDALEX organization and there have been changes in individuals in both the ANDALEX and IPA organizations. The attached information provides new pages for ANDALEX, GENWAL and WEST RIDGE. The ANDALEX information also applies to the Wildcat Loadout. The IPA information is relevant to both GENWAL and WEST RIDGE.

The format of the information with respect to ANDALEX has changed from prior filings. We have made the change to conform to the format of what has been filed on behalf of ANDALEX in Kentucky. We believe this should reduce the possibility of confusion once the information is within the OSM system.

There has been no change in the operator/permittee of any of these operations or in the ultimate ownership of either entity. Except as shown in the attachments, there have been no other changes in the information as contained in the materials on file with the Division.

We hope this information will allow you to keep your files current. Please feel free to contact either me or any of the individual operations directly should you have any questions.

Sincerely,

Douglas H. Smith, President
