**Subject:** Re: Monitoring at Grassy Trail Reservoir

Rob,

Please make the following revisions to the proposed monitoring schedule:

1. Survey points. Please clarify the accuracy (error) that the survey will be required.
2. The threshold criteria for the monitoring of all instruments should be for a ground acceleration exceeding 0.2g (as per RB&G's Addendum No. 1, dated October 24, 2005 for the "Grassy Trail Dam and Reservoir, Mining-Induced Seismicity" report).

Our proposed monitoring schedule is attached for your review and comment.

The attached file also includes a distribution list for the monthly monitoring data. I've tried to round up a phone number and email address for everyone involved. Please notify me of any corrections, or of any names or contact information to be added to or removed from the list.

Thanks,

Rob
