Types of Operations

- Underground
 Surface
 Loadout
 Processing
 Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The Permittee is current relative to the quarterly electronic submittal of surface and ground water monitoring information. N 10025 was issued due to the Permittee's dozer operators pushing coal above the crest of the cut bank in the left hand fork. Vegetation had not been removed and soils had not been recovered and segregated.

Inspector's Signature:

Steve Demczak
 Steve Demczak, Environmental Scientist III

Date

Thursday, July 31, 2008

Inspector ID Number: 39

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.

REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

1. Permits, Change, Transfer, Renewal, Sale

No new amendments have been submitted to the Division since the last inspection. There is a outstanding NOV at the coal stock pile area. Coal is outside the disturbed area and is on the topsoil. The permittee has enough coal to build a ramp for equipemnt to clean-up the effected area..

4.a Hydrologic Balance: Diversions

The diversions were inspected and the permittee will need to do maintenance to several section of different diversions. Sediment has started to build up within some of the diversion ditches. This is not a violation at this time. Diversions will still function as design at this time. Permittee has stated that a contractor will be contacted to clean out the sediment from the diversions.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment pond was inspected and I found no hazardous conditions to the pond. The pond did contain a very small amount ot water.

4.c Hydrologic Balance: Other Sediment Control Measures

Several straw blaes will need to be cleaned out on the main road to the site. Sediment has started to build up behind the straw blaes.

8. Noncoal Waste

Some non-coal waste material was at the warehouse storage area. The area will need to be clean-up.

14. Subsidence Control

This information is in the annual report.

18. Support Facilities, Utility Installations

No construction was taking place for new support facilities.
