1. Permits, Change, Transfer, Renewal, Sale

The DOGM permit will expire on April 1, 2009. The SPCC Plan needs to be updated. The last review was Sept. 20, 2004.

4.a Hydrologic Balance: Diversions

Diversions will need to be cleaned out in the near future. There is some ice and snow in some of the diversions.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment pond was inspected. I did not see any hazardous conditions to the pond during the inspection. There was a small amount of water within the pond. No discharging was occurring during the inspection.

4.e Hydrologic Balance: Effluent Limitations

The permittee has been in compliance with the UPDES permit with the last few water samples.

8. Noncoal Waste

The snow is almost melted and the mine needs to clean areas where the snow has melted. There are areas such as parking area that need attention in cleaning up trash.

16.b Roads: Drainage Controls

Diversions were functioning but will need attention due to sediment build-up.

18. Support Facilities, Utility Installations

No new construction has taken place since the last inspection.
