ADMINISTRATIVE OVERVIEW

West Ridge Resources, Inc.
West Ridge Mine
Five Year Permit Renewal
C/007/0041
Carbon County, Utah

April 1, 2009

BACKGROUND

West Ridge Resources, Inc. (Andalex Resources, Inc. and Intermountain Power Agency) permitted this underground mining operation (West Ridge Mine) in Carbon County, Utah approximately 10 miles north of Sunnyside, Utah in April 1999. The permit area is located on the east side of the Price River drainage basin at the western edge of the Book Cliffs at an elevation ranging from 6,800 feet at the mouth of C Canyon to over 8,800 feet on the top of West Ridge. The mine is located on federal and state owned land leased by the applicant.

Previous mining in the area consisted primarily of small exploration type projects. In the mid-1950's, the road along the bottom of C Canyon was constructed to a drill site located in the right fork. The road was improved again in 1985 to facilitate drilling equipment for a water monitoring drill hole site in the right fork.

Mining has also occurred underground within the lease from the Sunnyside No. 2 mine. During 1959 and 1960 Kaiser Coal mined a two-entry exploration section northwestward into the center of the coal lease (SL-068754), for a total distance of 11,000 feet along the strike of the Lower Sunnyside seam. A section was developed off from this main entry in which mining proceeded in an up-dip direction to the west for approximately 2000 feet before breaking out in B Canyon. This breakout was utilized as an intake air portal until 1991 when the portal was sealed and backfilled.

In the early 1980's Kaiser submitted an application to permit the B Canyon area but failed to pursue the application. BP America Inc. acquired the lease and initiated permitting discussions with the Division, but after starting a water monitoring program for the area, sold the lease to Andalex Resources, Inc. who then pursued the permit.

The initial permit was issued on April 1, 1999 with 4 conditions. Condition number 3 was satisfied when the DWR completed a survey for the Mexican Spotted Owl and concluded on October 16, 2001 that the area was not suitable habitat for the owl. Condition number 4 was satisfied when information was submitted to satisfy Division Order DO-00A. This amendment received final approval on May 16, 2006. The permit area initially encompassed approximately

2660 acres of which 29 acres were disturbed for the surface facilities area. In addition to the mine site, a substitute topsoil borrow area (9.6 acres) was permitted as backup soil material for reclamation at the proposed mine site. This site is located approximately 1½ miles west of the mine site and would only be used to supplement existing soil resources at the mine site if needed.

There is also has an approved “experimental practice” at this mine site which involves leaving soil resources in-place during the mining operation rather than salvaging and stockpiling them for later reclamation use. Methods have been proposed to protect the soil in-place and at the conclusion of mining using the in-situ soils to accomplish reclamation.

On March 25, 2002 the Whitmore Canyon extension area received mining plan approval and added 1646.34 acres to the existing mine, which added several years to the life of the mine. With the addition of the Whitmore Canyon Lease, the permit area then totaled 4307.63 acres. An additional 74.92 acres for the Penta Creek fee lease were approved on April 14, 2003. This brought the permit area to 4382.55 acres.

On September 23, 2005 two (2) new SITLA coal leases (ML 47711 & ML 49287) were added to the West Ridge Mine. Mining in these State leases was contemplated in the original permit application, but could not occur until the leases were acquired and a permit issued. These leases added 1682.34 acres to the existing mine. The leases will be accessed via the underground works and mining will be conducted using longwall methods. With the addition of these two SITLA coal leases the permit area totals 6114.89 acres.

Mining occurs in the Lower Sunnyside coal seam using longwall mining methods. Continuous miners will be used mainly for mine development to support the longwall. It is anticipated that the mine will produce approximately 3 million tons of coal per year. The total future recoverable reserves could be as much as 50 million tons depending on the ability to mine under deeper cover.

The land surface of the permit area consists of rugged, southwest-facing cliffs, which are deeply dissected by steep ephemeral drainages. Pre-mining land use of the West Ridge mine area includes grazing, wildlife habitat, coal mining and recreational activities such as hunting. No agricultural activities have been conducted in or around the proposed permit area.

PERMIT RENEWAL

West Ridge Resources, Inc. made application to the Division of Oil Gas and Mining for a five year permit renewal for the West Ridge Mine on November 14, 2008. Additional information was submitted on December 18, 2008. This renewal encompasses the same permit area and disturbance as currently approved in the permit.

The renewal application was determined administratively complete on January 21, 2009. Public notice for this permit renewal was published in the Sun Advocate on January 27, February 3, 10, and 17, 2009.

ANALYSIS

Requisite information for the permit renewal application was made and all notices were published as required. As result of the publication in the Sun Advocate, no comments were received.

The amount of bond required for reclamation of the site has recently been reviewed, when the operator installed some gob vent boreholes in 2008. It was determined that the amount of bond currently required is \$1,966,000 in 2011 dollars. A bond in the amount of \$2,117,000 is posted and is considered adequate to allow the renewal to proceed.

RECOMMENDATION

Approval for this permit renewal is recommended.

This legal description is for the permit area of the West Ridge Mine and is shown on Map 5-2 (Surface Ownership Map) of the West Ridge Mine Mining and Reclamation Plan. The permittee is authorized to conduct coal mining and reclamation operations on the foregoing described property subject to the conditions of all applicable conditions, laws and regulations.

- Sec. 3** **COMPLIANCE** - The permittee will comply with the terms and conditions of the permit, all applicable performance standards and requirements of the State Program.
- Sec. 4** **PERMIT TERM** - This permit is effective on April 1, 2009 and expires on April 1, 2014.
- Sec. 5** **ASSIGNMENT OF PERMIT RIGHTS** - The permit rights may not be transferred, assigned or sold without the approval of the Division Director. Transfer, assignment or sale of permit rights must be done in accordance with applicable regulations, including but not limited to 30 CFR 740.13 {e} and R645-303-300.
- Sec. 6** **RIGHT OF ENTRY** - The permittee shall allow the authorized representative of

the Division, including but not limited to inspectors, and representatives of the Office of Surface Mining Reclamation and Enforcement (OSM), without advance notice or a search warrant, upon presentation of appropriate credentials, and without delay to:

- (a) have the rights of entry provided for in 30 CFR 840.12, R645-400-220, 30 CFR 842.13 and R645-400-110;
- (b) be accompanied by private persons for the purpose of conducting an inspection in accordance with R645-400-100 and R645-400-200 when the inspection is in response to an alleged violation reported to the Division by the private person.

Sec. 7 **SCOPE OF OPERATIONS** - The permittee shall conduct coal mining and reclamation operations only on those lands specifically designated as within the permit area on the maps submitted in the approved plan and approved for the term of the permit and which are subject to the performance bond.

Sec. 8 **ENVIRONMENTAL IMPACTS** - The permittee shall take all possible steps to minimize any adverse impact to the environment or public health and safety resulting from noncompliance with any term or condition of the permit, including, but not limited to:

- (a) Any accelerated or additional monitoring necessary to determine the nature and extent of noncompliance and the results of the noncompliance;
- (b) immediate implementation of measures necessary to comply; and
- (c) warning, as soon as possible after learning of such noncompliance, any person whose health and safety is in imminent danger due to the noncompliance.

Sec. 9 **DISPOSAL OF POLLUTANTS** - The permittee shall dispose of solids, sludge, filter backwash or pollutants in the course of treatment or control of waters or emissions to the air in the manner required by the approved Utah State Program and the Federal Lands Program which prevents violation of any applicable state or federal law.

Sec. 10 **CONDUCT OF OPERATIONS** - The permittee shall conduct its operations:

- (a) in accordance with the terms of the permit to prevent significant, imminent environmental harm to the health and safety of the public; and
- (b) utilizing methods specified as conditions of the permit by the Division in approving alternative methods of compliance with the performance

standards of the Act, the approved Utah State Program and the Federal Lands Program.

- Sec. 11** **EXISTING STRUCTURES** - As applicable, the permittee will comply with R645-301 and R645-302 for compliance, modification, or abandonment of existing structures.
- Sec. 12** **RECLAMATION FEE PAYMENTS** - The operator shall pay all reclamation fees required by 30 CFR Part 870 for coal produced under the permit, for sale, transfer or use.
- Sec. 13** **AUTHORIZED AGENT** - The permittee shall provide the names, addresses and telephone numbers of persons responsible for operations under the permit to whom notices and orders are to be delivered.
- Sec. 14** **COMPLIANCE WITH OTHER LAWS** - The permittee shall comply with the provisions of the Water Pollution Control Act (33 USC 1151 et seq,) and the Clean Air Act (42 USC 7401 et seq), UCA 26-11-1 et seq, and UCA 26-13-1 et seq.
- Sec. 15** **PERMIT RENEWAL** - Upon expiration, this permit may be renewed for areas within the boundaries of the existing permit in accordance with the Act, the approved Utah State Program and the Federal Lands Program.
- Sec. 16** **CULTURAL RESOURCES** - If during the course of mining operations, previously unidentified cultural resources are discovered, the permittee shall ensure that the site(s) is not disturbed and shall notify the Division. The Division, after coordination with OSM, shall inform the permittee of necessary actions required. The permittee shall implement the mitigation measures required by Division within the time frame specified by Division.
- Sec. 17** **APPEALS** - The permittee shall have the right to appeal as provided for under R645-300-200.
- Sec. 18** **SPECIAL CONDITIONS** - There are special conditions associated with this permitting action as described in attachment A.

The above conditions (Secs. 1-18) are also imposed upon the permittee's agents and employees. The failure or refusal of any of these persons to comply with these conditions shall be deemed a failure of the permittee to comply with the terms of this permit and the lease. The permittee shall require his agents, contractors and subcontractors involved in activities concerning this permit to include these conditions in the contracts between and among them.

These conditions may be revised or amended, in writing, by the mutual consent of the Division and the permittee at any time to adjust to changed conditions or to correct an oversight. The Division may amend these conditions at any time without the consent of the permittee in order to make them consistent with any federal or state statutes and any regulations.

SPECIAL CONDITIONS

1. This permit specifically authorizes West Ridge Resources, Inc. to conduct an experimental practice in conjunction with their approved Coal Mining and Reclamation Operations at the West Ridge Mine, which allows for the protection of topsoil "IN-PLACE" rather than salvaging soil and stockpiling it for future reclamation. West Ridge Resources, Inc. will follow the plans as outlined in the approved Mining and Reclamation Plan, Chapter 2 and Appendix 2-6 and will be required to evaluate the effectiveness of the experimental practice on an annual basis. The Division will conduct annual reviews of the practice to ensure that it fully protects the environment and the public health and safety. In the event that the experimental practice is determined to be not as environmentally protective as would otherwise be required by standards promulgated under R645-301 and R645-302, revised reclamation plans which utilize standard reclamation technology will be required.

2. West Ridge Resources, Inc. must submit water quality data for the West Ridge Mine in an electronic format through the Electronic Data Input web site, <http://hlunix.hl.state.ut.us/cgi-bin/appxogm.cgi>.

RE: Compliance Review for Section 510c Findings, West Ridge Resources, Inc., West Ridge Mine, C/007/0041

As of the writing of this memo, there are no NOV's or CO's which are not corrected or in the process of being corrected. There are no finalized Civil Penalties which are outstanding and overdue in the name of West Ridge Resources, Inc. West Ridge does not have a demonstrated pattern of willful violations, nor have they been subject to any bond forfeitures for any operation in the state of Utah. There is one violation (#10033) currently pending, but it is still within the prescribed abatement period and the Company has been taking the appropriate steps to correct the violation.

Attached is the findings evaluation from the Applicant Violator System (AVS), dated March 4, 2009.
