Steve....Regarding West Ridge NOV 10063 (additional coal fines in C Canyon drainage), on 12/15/2010, Scamp finished cleaning out catchment C. The stream cleanup with the brooming hand crews had been completed during the month of September, and was later inspected by Ingrid Campbell. Catchment A was cleaned earlier on 9/30/2010, and catchment E was cleaned in late October. In total, 38 truck loads of material were cleaned out of the catchments, involving approximately 418 cubic yards. This should fulfill the requirements for abatement of NOV 10063. Based on the authority of the Division's letter of November 16, 2010, we are commencing reclamation of catchments C and E. Thanks

Dave
