Hi everyone,

Could you please pass this email along to the database contacts at your assigned mines?

The database is still down, the under maintenance sign has been removed so that we can work with the live page and find where and why it is pointing back to the old server. I really hope to have this fixed soon, and as soon as it is I will let everyone know.

In the meantime, be assured that the deadlines for data submission this quarter, and for review of the 3Q '09 data will be extended. The exact extension period will depend on the date the database is fixed.

Thanks for your patience, I apologize for the inconvenience.

Dana
