Dave,

I wanted to give you a heads up on where we're at with the coal fine accumulation NOV at West Ridge.

- *NOV i #10063 ssued September 29th, 2010*
- *On July 21st, 2010, an extension was granted to complete abatement measures by October 19th.*

The October 19th deadline is the end of our 90 day abatement period as established by the rules. That said, the onus is on you at this point to make a demonstration that you need an extension beyond 90 days. R645-400-327 outlines the circumstances where an extension beyond 90 days can be granted. In order for the Division to grant an abatement period beyond 90 days, concurrence from the Director is required.

That's where we're at. After speaking with you on the phone yesterday, it sounded like the clean-up of the channel would not be completed by Tuesday the 19th. In addition, the deficiency responses would need to be in to us by the 19th as well. Give me a call if you have any questions.

Regards,
Steve
