Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

Dave Shaver and James Newman (both engineers with Andalex) and I discussed the permitting requirements for re-opening a pre-SMCR A exploration breakout in B Canyon (1/5 mile east of the west ridge mine) that was developed by Kaiser Coal Co in the 1960s. The site was reclaimed by DOGM/Abandoned Mines in May 1998 (AMR/007/930). West Ridge anticipates reopening this breakout to examine roof stability prior to mining through the area and reclaiming the site again within 6 months. We drove to the site which has slight snow cover (approximately 4 inches) to observe site conditions..

3. Topsoil

The site is previously disturbed. Soil surveys upstream of the site may provide baseline information. Vegetation visible on the site included sagebrush and rabbitbrush. The shrubs should be grubbed and stockpiled for replacement on the surface as mulch. The surface foot of soil should be salvaged and stockpiled to be replaced on the surface of the reclaimed site.

12. Backfilling And Grading

The surface foot of material should be handled separately and stored for replacement on the surface of the reclaimed site. The remainder of the fill may be stockpiled or used for construction of a ramp or roadway to the portal.
