Hi JD,

Sorry I've missed you and James Newman's calls. I'm going to give you a call a little later. I've been out of the office.

We've got some problems with West Ridge water quality data. You'll need to get back to me ASAP to avoid a violation for 1st quarter 2012 and 2nd quarter 2012.

- 1) UG-1: Missing specific conductance for April and May 2012.
- 2) Spring SP-80: Missing flow for 2nd quarter 2012.
- 3) LF-1, LF-2, RF-1 and RF-2: data is still in the pipeline that needs to be ok'd by you in order to be uploaded for 2nd quarter 2012.
- 4) Stream sites ST-6 and ST-8 are still in the pipeline for 1st quarter 2012 and need to be ok'd for upload.
- 5) ST-15- No data at all for stream site ST-15 for 2nd quarter 2012 (i.e. not in pipeline).
- 6) UPDES 002: zero flow was reported for the entire 1st quarter of 2012 for Outfall 002. Where are the flow values JD?
- 7) UPDES 002: Missing specific conductance for March of 2012 (i.e. 1st quarter) and for April and May (i.e. 2nd quarter).

Get back to me as soon as you can.

Thanks,
Steve
