Hi Steve,

Attached is the 2nd Quarter Flume Readings for the West Ridge Mine. The upper left flume often times had no flow and when it did the flow it was too small for the flume to read the flow.

I have addressed all of the other missing items on your email for the West Ridge Mine also any missing data from Lila Canyon 1st and 2nd Quarter have been entered and ok'd into the database.

Thank you for your patience.

Thank You,

JD Leonard
