Good morning JD,

I just spoke with Steve Demczak about the 4 flumes at West Ridge. As we're now in the spring runoff period, it's really important that the flumes are up and running to capture the high flows. To that end, we need to go out there and inspect the flumes and document that they're good to go.

Whenever Steve does his monthly inspection, would you coordinate with him and set up a time to go out there. I will try and make it if I can. My schedule is a little heavy on the meeting side of the spectrum for the next couple of weeks...but I might be able to squeeze in a trip down if I get enough of a heads up.

Let me know what you guys come up with.

thanks,  
Steve
