JD,

I've gone through all of the available West Ridge water quality data and found a few holes that need to be addressed as soon as possible.

- 1). Site UG-1 (monthly underground mine water sample): there is a sample in the pipeline from 12/31/2012 that needs to be ok'd by you for uploading.
- 2). Continuous flow data (LF-1, LF-2, RF-1 and RF-2): Please send me the excel files with the continuous flow data for 2nd and 3rd quarter 2013. As the submission of this data does not require the use of the Division's data-base, the 2nd quarter data is very late. Obviously, you have until the end of this year to submit the continuous flow data for 3rd quarter 2013.
- 3). UPDES Outfall 001: I'm missing the data for this outfall for 4th quarter 2012 and 1st quarter 2013. As this is the pond that rarely produces a discharge, please input the "zero flow" values as soon as you can.

It appears that there's a fair amount of the 3rd quarter data in the pipeline already that hasn't been ok'd for upload, but again...you have until December 31st to get that in and ok'd.

Please give me a call as soon as you can. I need to get these reports wrapped up by the end of next week so if you could provide the data outlined above by the end of this week or very early next, I'd really appreciate it.

Regards,
Steve
