Hi JD,

A couple of data points are missing for 3rd quarter 2013.

1) Spring SP-80 is missing it's flow value. The other water quality parameters are there so I'm assuming you just missed the flow.

2) UPDES 002 is missing a field dissolved oxygen reading for the month of July.

Would you e-mail those values to me when you get a chance? I can go ahead and plug them in.

Thanks,
Steve
