Re: West Ridge Mine C/007/041  
Request to Cease Seismic Monitoring at Grassy Trail Dam, East Carbon Utah

Dear Mr. Haddock,

As per requirements set forth by the West Ridge MRP, Seismic Monitoring at Grassy Trail Dam was to be conducted during the mining of panel blocks 18-21, as well as panel 7. This monitoring is spelled out on pages 5-29 and 5-30 in Chapter 5, as well as in Appendix 5-13A.

RB&G Engineering has been conducting the monitoring at the dam to meet these requirements. At this point in time we have currently mined out all of the panels mentioned above. The last panel, Panel 19, was successfully completed in September of 2015.

Due to the panels in the monitoring plan being completed, and current and historical seismic data showing little to no mining-induced impact on the dam, I am requesting that Seismic Monitoring be permitted to cease at Grassy Trail Dam, effective upon approval.

Please contact me with any questions or concerns you have regarding this request.

Sincerely,

Karin Odendahl-Madsen
