Hi Karin,

I won't be in on Friday. I basically just wanted to ask about some of the monitoring requirements for Grassy Trail. For example, the monuments on the embankment are to be surveyed monthly. The last survey I can find is September 2015. April and May's inclinometer readings are missing. There are supposed to be weekly site reconnaissance/visual inspections and the piezometer readings haven't been done weekly.

Unless you or RB&G have this information and get it to me fast, I'm afraid I'm going to have to issue another violation.

If you could address those items specifically, I'd appreciate it.

Thanks,
Steve

Steve,

Unfortunately I won't be available tomorrow. Will you be in Friday?

Subject: West Ridge Seismic Monitoring

Hi,

If you can, give me a call tomorrow. I need to run some things past you on this West Ridge seismic monitoring business.

Thanks,
Steve
