RE: Sunnyside Cogeneration Associates "Star Point Waste Fuel" Mine - Application for a Permit Revision, Sediment Ponds 5 & 6

Dear Sir or Madam:

This in response to the Utah Division of Oil, Gas, & Mining's (UT-DOGM) October 21, 2004, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Sediment Ponds 5 & 6, has determined that it proposes to add revised drawings for Sediment Ponds 5 & 6 depicting the actual as-built dewatering riser details to the approved permit application package for the Star Point Waste Fuel mine, Utah State permit C/007/042.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Sediment Ponds 5 & 6 with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the October 21, 2004 request to the Bureau of Land Management and the U.S. Forest Service for their review and comment. Neither agency
