Re: Approval of Star Point Mine Permit Application, Sunnyside Cogeneration Association, Star Point Refuse Mine, C/007/042-PM02A, Outgoing File

Dear Mr. Scott:

The Star Point Waste Fuel Mine permit application was approved November 14, 2003. The Division received final copies of the application in December 2003. These copies were compiled with exhibits and maps received in 2003 as per the accompanying C1C2 forms and distributed to you, the Division's Salt Lake and Price offices, and to PSOMAS consultants.

The electronic version of the plan is being sent with this letter to the Office of Surface Mining and the Bureau of Land Management, which includes all the exhibits and maps in the final hard copy.

If you have any questions, please call me or Priscilla Burton at (801) 538-5288.

Sincerely,

Pamela Grubaugh-Littig
Permit Supervisor
