RE: Sunnyside Cogeneration Associates, "Star Point Waste Fuel" Mine - Application for a Permit Revision, Post Mining Land Use Change, Task ID No. 3496

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) March 2, 2010, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Post Mining Land Use Change, has determined that it responds to deficiencies found during the review of the original application to change the post mining land use of a portion of the permit area from fish and wildlife habitat, grazing land and recreation to industrial/commercial to facilitate future natural gas production at the Star Point Waste Fuel mine, Utah State permit C/007/0042.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR PART 740 and PART 746. Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Post Mining Land Use Change, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the March 2, 2010, request to the Bureau of Land Management and the USDA Forest Service for their review and comment.

In an electronic submittal dated March 3, 2010, the USDA Forest Service stated in its opinion the proposed permit revision did not constitute a mining plan modification requiring Secretarial approval.

The Bureau of Land Management did not provide any comments in the thirty day time frame established by the Federal regulations under 30 CFR 944.30, Article VI. D.

Please notify the applicant of our decision on this matter.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 293-5038.

Sincerely,

A handwritten signature in blue ink, appearing to read 'R. Postle', with the word 'acting' written in smaller letters below the signature.
