I have completed my review of Task 3495 and Task 3496 and recommend approval, pending an AVS evaluation. (The locked entities in the AVS database require updating to include changes to officers and directors that were included with the applications.)

I have emailed the changes to Linda Keene at OSM.

Information in the application indicates that an environmental manager for the site is employed by a company called Constellation Operation Services Inc. (COSI). Rusty Netz tells me that he is also an employee of COSI. COSI is listed in the AVS, but was not previously linked to Sunnyside Cogen. I have linked them as a contract manager at the site, along with Savage.

Hi Ingrid and Priscilla,

You may already be aware of this, but tasks 3495 and 3496 for Star Point Refuse are material submitted by SCA in response to deficiencies sent by the Division on 2 November 2009 for Tasks 3361 and 3363. You two were the only reviewers who identified deficiencies. I've included links below for the various files associated with Tasks 3361 and 3363.

I believe that the review of Tasks 3495 and 3496 should be fairly straightforward, i.e., checking the re-submitted plans against the deficiencies identified. Am I correct?

Thanks,
Kevin
