Scott,  
Thank you for sending this over. The notice looks fine for publishing, although I'd like to request that you revise it to read:

Copies of the permit will be available for inspection at the:

Utah Division of Oil, Gas and Mining

not "Utah Division of Gas and Mining" as it currently reads. There is no need for additional review by the Division prior to publication.

Kevin

Kevin,

We have made modifications to the public notice document following the suggestions on your email.

I have attached a copy of the revised document for your final review.

S Scott Carlson, PE, PLS

Twin Peaks PC

**Subject:** Public notices for change in postmining land use & change in permit area

Rusty,

To follow up on our call this afternoon, here are comments on the public notices for the amendments submitted for change in postmining land use & change in permit area.

Change in Postmining Land Use (Task 3496)

The Public Notice which was submitted with the application package for change in postmining land use (Task 3496) requires a minor modification. This notice is approved for publication after the following change is made. A letter documenting the administrative completeness of the change in postmining land use is being finalized and will be sent to you shortly.

About halfway down, change the line "Changes to the proposed permit area occur within lands described as:" to "Changes to the **postmining land use** occur within lands described as:"

Permit Area Reduction (Task 3495)

Since our call I confirmed that the Change in Permit Area (Task 3495) will require a Phase 3 Bond Release in order to remove liability associated with the area where usage is being transferred to ConocoPhillips. The public notice for the reduction in permit area and Phase 3 Bond release should not be published until the area is reclaimed (coal fines removed). Prior to publication, the Public Notice will require modification to meet the requirements of R645-301-880.120, including:

- Permit number
- Approval date
- Type and amount of bond filed and portion sought released
- Type and dates of reclamation work performed and results achieved

I can review the public notices once corrected and prior to publication. Please contact me at 801 538 5352 with any questions.

Thank you,  
Kevin
