RECEIVED
MAR 31 2016
DIV. OF OIL, GAS & MINING

RE: Sunnyside Cogeneration Associates (SCA) Annual Reports
Sunnyside Refuse, C007/035
Star Point Waste Fuel, C/007/042

Dear Mr. Haddock,

Enclosed, please find the Annual Reports for the Sunnyside Refuse, C007/035 and Star Point Waste Fuel, C/007/042 mine sites. As requested, we have saved the reports and a variety of supplemental information electronically on the enclosed CD.

Your January 8, 2016, standard letter mentioned several items, in addition to the regular report information.

1. Raptor and archeology reports – SCA is not required to submit any raptor or archeology reports.
2. Mine map identifying mining in 2015 – SCA has submitted with the report an updated map showing conditions of mining in 2015.
3. Mining proposed for the next five years – SCA maintains its current plan of proposed mining (projecting more than five years) in each of the MRP documents. Given the nature of SCA's mining activity (excavation of the waste piles), mining plans are not changing often and annual updates to the plan are not required.
4. Notices of Proposed Mining sent to districts, occupants and owners of surface property above the underground workings – SCA does not have any underground workings, no occupants exist and SCA owns the surface property at Sunnyside and most of the surface property at Star Point. Given the nature of SCA's mining activity, and since annual updates to the plan are not required, the notices provided to BLM (surface owner of a portion of the Star Point property) in past years (included in the approved MRP) are sufficient.

If you have any questions, please feel free to call Rusty Netz or myself at (435) 888-4476.

Thank You,

Gerald Hascall / R. N.

Gerald Hascall

Annual Report

This Annual Report shows information the Division has for your mine. Submit the completed document and any additional information identified in the Appendices to the Division by the date specified in the cover letter. During a complete inspection an inspector will check and verify the information.

GENERAL INFORMATION

Company Name	Sunnyside Cogeneration Assoc.	Mine Name	Star Point Waste Fuel
Permit Number	C/007/0042	Permit expiration Date	2018-11-14
Operator Name	Plant Manager - Gerald Hascall	Phone Number	+1 (435) 888-4476
Mailing Address	PO Box 159	Email	
City	Sunnyside		
State	UT	Zip Code	84539

DOGGM File Location or Annual Report Location

Excess Spoil Piles	<input checked="" type="checkbox"/> Required <input type="checkbox"/> Not Required	Submitted Quarterly to DOGM
Refuse Piles	<input checked="" type="checkbox"/> Required <input type="checkbox"/> Not Required	Submitted Quarterly to DOGM
Impoundments	<input checked="" type="checkbox"/> Required <input type="checkbox"/> Not Required	Submitted Quarterly to DOGM
Other:		

OPERATOR COMMENTS

Sediment ponds, Refuse Pile and Excess Spoil Pile were inspected quarterly and PE Certified reports submitted to the division.
 All impoundments performed as designed. No discharges occurred during 2015.
 The refuse pile is being excavated as intended and in conformance with the approved design
 The Disposal Area / Excess Spoil Pile is in conformance with the approved plan
 No notices of violation were received during 2015.

REVIEWER COMMENTS

Met Requirements Did Not meet Requirements

FUTURE COMMITMENTS AND CONDITIONS

The following commitments are not required for the current annual report year, but will be required by the permittee in the future as indicated by the "status" field. These commitments are included for information only, and do not currently require action. If you feel that the commitment is no longer relevant or needs to be revised, please contact the Division.

Title: SOIL SAMPLING

Objective: To ensure four feet of suitable material.

Frequency: At final reclamation sample for parameters described in Section 242 and Sec. 542.700

Status: During reclamation

Reports: Confer with Division and include in Annual Report

Citation: Vol 1 Sec. 242

OPERATOR COMMENTS

Required soil sampling will occur in preparation for final reclamation

REPORTING OF OTHER TECHNICAL DATA

Please list other technical data or information that was not included in the form above, but is required under the approved plan, which must be periodically submitted to the Division.

Please list attachments:

SCA excavated approximately 295,408 tons of refuse material from this site and transported it to the SCA Sunnyside Facility
A small amount of material (from pond cleaning) was placed in the Disposal Area during 2015

Reviewer Comments

MAPS

Copies of mine maps, current and up-to-date, are to be provided to the Division as an attachment to this report in accordance with the requirements of R645-301-525.240. The map copies shall be made in accordance with 30 CFR 75.1200 as required by MSHA. Mine maps are not considered confidential.

- Appendix D Mine Map**

I. GENERAL PERMIT INFORMATION

Permit Number: C/007/042

Mine Name: Star Point Waste Fuel

Permittee: Sunnyside Cogeneration Associates

**Company Representative
& Resident Agent:** Mr. Gerald Hascall
Plant Manager
One Power Plant Road
PO Box 159
Sunnyside, UT 84539
(435) 888-4476
(435) 888-2538 fax

Date of Initial Permanent Program Permit: November 14, 2003

Date of Most Recent Permit Renewal: November 14, 2013

The reclamation bond for SCA's Star Point facility was renewed during mid-term review 2011. It will be time again to renew the reclamation bond in 2016.

Date of Expiration: November 14, 2018

No permit amendments were submitted for this site in 2015.

An amendment was submitted previously (task 3496) for which approval is still waiting. This amendment addresses a change in the permit boundary to remove the approved industrial PMLU area from the permit area. This amendment is waiting for reclamation to be completed in the area in accordance with the revised reclamation plan. A portion of the reclamation (focused on removing coal materials from the area) has been completed and it is likely that this reclamation work will be finished soon.

II. IDENTIFICATION OF OTHER PERMITS

MSHA ID Numbers: Star Point Refuse Pile Mine ID No. 42-02334

MSHA granted approval for final abandonment of the Coarse Refuse Pile on January 28, 2004. As such, SCA's Star Point Waste Fuel Mine has no MSHA qualifying facilities or structures. The mine ID number remains active.

Storm Water Permit Number: UTR000604 Approved effective August 29, 2002
Renewed effective Jan 1, 2012
Expires December 31, 2016

Under the Utah Pollutant Discharge Elimination System, the Utah Department of Water Quality issued SCA a Multi-Sector General Permit for Storm Water Discharges associated with Industrial Activities from Coal Mines and Coal Mining-related Facilities. This permit will need to be renewed later in 2016

UPDES Discharge Permit Number: UTG040025 Approved Sept 1, 2002
Renewed Sept 1, 2013
Expires August 31, 2018

The UDWQ has also issued SCA a general storm water discharge permit to regulate discharges from the three sediment ponds in the mining permit area (Ponds 005, 006 & 009). SCA submits monthly discharge monitoring reports to the DWQ. UDEQ DWQ renewed the General Coal Mining Permit No. UTG040000 in 2013. SCA's general permit was then renewed with reference to the state permit.

Air Quality Permit:

The operations on the Star Point Waste Coal Pile are of such a nature that the mining operation generates little to no emissions. The Utah State Department of Air Quality (DAQ) has determined that special air quality permitting is not required. DAQ issued a Small Source Exemption – De Minimis Emissions permit / letter for the Star Point Waste Fuel operation.

III. CERTIFIED REPORTS

Each impoundment as well as the Refuse Pile and the proposed Disposal Area were inspected in accordance with the requirements of the Mining and Reclamation Permit. The quarterly and annual inspection / certification reports were submitted to the Division. These reports are also included in **Appendix A**.

Excavation of Refuse from the Refuse Pile occurred in general conformance with the operational criteria and performance standards established in the permit. In 2015, the operator excavated coal material by removing refuse directly from the top of the main refuse pile.

A small amount of material was placed in the Disposal Area during the year. This material came from cleaning of sediment ponds.

IV. REPORTING OF OTHER TECHNICAL DATA

1. Climatological Data

Not required in the approved permit.

2. Subsidence Monitoring Data

No subsidence monitoring is required by the approved plan. No material damage or diminution within the Permit Area will be caused by subsidence because no underground coal resources are available within the permit area that would cause subsidence. No past or future underground coal mining operations have or are likely to occur within the SCA Permit Area.

3. Vegetation Monitoring Data

Two areas within the permit area have received final reclamation treatment. These are located at the west end of the permit area and at the southeast side, both adjoining the permit boundary. These areas were reclaimed by RAG in accordance with their reclamation work on the Star Point Mine. These areas received final (Phase III) bond release in 2013.

4. Raptor Surveys

Raptor studies were conducted by DWR in 2002. No additional periodic raptor studies are required by the approved permit.

5. Water Monitoring Data

Water monitoring is not required in the approved plan. SCA's operations to remove the refuse pile are not located in or around surface or ground water sources. Storm runoff is controlled and treated in sediment ponds regulated through the Storm Water Permit and UPDES Discharge Permit discussed above. The UPDES Compliance Reports for 2015 are included in **Appendix B**.

6. Geological / Geophysical Data

No periodic Geological / Geophysical monitoring is required in the approved plan. The data included as resource information in the plan has been determined adequate for the operations of SCA. In the event that the operations of SCA change dramatically such that additional geologic or geophysical data becomes necessary, additional analysis will be performed at that time.

7. Engineering Data

a. Refuse Excavation

During 2015, SCA excavated a total of 295,408 tons of coal materials at the Star Point facility. This material was all transported to SCA's Sunnyside facilities.

b. Disposal Area

During 2015 a small amount of material was deposited in the disposal area.

Inspections of the refuse area and the disposal area are conducted on a quarterly basis. Reports from these site visits are submitted to the Division throughout the year and have been included in this report with the certified reports.

8. Soils Monitoring Data

No periodic soil monitoring is required by the approved plan. The approved subsoil storage pile reserved for reclamation activities has previously undergone soils studies from which the data is included in Chapter 2 of the Permit.

In the event that SCA determines it necessary to utilize soils from other sources for reclamation, the proper analysis will be performed at that time.

9. Other Data

No additional periodic data is required in the approved plan.

V. LEGAL, FINANCIAL, COMPLIANCE & RELATED INFORMATION

Sunnyside Cogeneration Associates is a joint venture between Sunnyside Holdings I, Inc. and Sunnyside II, L.P. **Appendix C** includes copies of the Certificates of Existence for Sunnyside Cogeneration Associates, Sunnyside Holdings I, Inc. and Sunnyside II, L.P. The Utah Department of Commerce, Division of Corporations and Commercial Code issues these certificates. They demonstrate that the entities are in good standing with the State of Utah.

VI. MINE MAPS

The mine map included in **Appendix D** of this report identifies the areas mined during 2015. This refuse is utilized as fuel for the Sunnyside Cogeneration Facility. The aerial survey used to generate contours of the site was performed in April 2013. A photo inset on the drawing documents the conditions in 2015.

Mining activity proposed for the next five years is projected to occur in general conformance with the mining plan shown on the PE Certified drawings approved in the Mining and Reclamation Permit.

FUTURE COMMITMENTS AND CONDITIONS

The following commitments are not required for the current annual report year, but will be required by the permittee in the future as indicated by the "status" field. These commitments are included for information only, and do not currently require action. If you feel that the commitment is no longer relevant or needs to be revised, please contact the Division.

Title: SOIL SAMPLING

Objective: To ensure four feet of suitable material.

Frequency: At final reclamation sample for parameters described in Section 242 and Sec. 542.700

Status: During reclamation

Reports: Confer with Division and include in Annual Report

Citation: Vol 1 Sec. 242

OPERATOR COMMENTS

Required soil sampling will occur in preparation for final reclamation

REPORTING OF OTHER TECHNICAL DATA

Please list other technical data or information that was not included in the form above, but is required under the approved plan, which must be periodically submitted to the Division.

Please list attachments:

SCA excavated approximately 295,408 tons of refuse material from this site and transported it to the SCA Sunnyside Facility
A small amount of material (from pond cleaning) was placed in the Disposal Area during 2015
