**Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:**

The roads were muddy and I could not inspect the complete disturbed area. I most likely will be able to inspect the remote areas in April.

The refuse pile was active during the inspection. Trucks were in the process of loading out the refuse material.

**1. Permits, Change, Transfer, Renewal, Sale**

There are no permitting actions with the Division at this time.

**2. Signs and Markers**

I inspected the identification sign and it meets the requirements of the R645 Coal Rules. The sign has all the required information. See Photo

**4.a Hydrologic Balance: Diversions**

I inspected a few diversions and culverts throughout the property. The diversions and culverts had little to no snow. They were open for water to flow. These structures are functioning as designed. No water was noticed flowing within the diversions.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures. See Photo

**7. Coal Mine Waste, Refuse Piles, Impoundments**

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The refuse pile is active. The permittee was mining some of the refuse for fuel for the power plant.

**8. Noncoal Waste**

The property was clear of non-coal waste materials such as oil, trash and grease cans.

**16.a Roads: Construction, Maintenance, Surfacing**

The roads were compacted with no dust control problem. The roads were wet and muddy from the melting snow.
