Subject: Covol refuse tests for 3 sites

Met with counsel today to review that Covol will perform test runs at its facility using coal waste from Star Point Refuse, Skyline refuse pile and Emery Deep refuse pile. On the basis that Covol is working with OGM to develop a permit, and that Covol, for now, tells us (via their 2-12-07 letter) that no refuse will be disposed of on their site, then OGM can allow the 'test' coal refuse amounts to leave those 3 permitted disposal sites.
