Daron...

In consideration of the Division not yet granting a permit for the Headwaters / COVOL operation, am I authorized to issue violations to the applicant / future Permittee ?

I believe I CC'd you the E-mail I sent to Gina Rau concerning her question about using material left over from the air processing of the West Ridge coal as material for road surfacing (it was noted on the road berm between their permit area and the Ridge road). Although I refer to this material as "reject", COVOL personnel referred to it as "aggregate". I suggested to them that they clean it up; my March inspection is coming due the week of March 25.

Do I have leverage here to get this done (i.e., a NOV) ?

Thanks.
