4.b Hydrologic Balance: Sediment Ponds and Impoundments

Mr. Rich White, Utah registered professional engineer with EarthFax Engineering, conducted the Annual impoundment inspections for the East and West ponds on December 21, 2011. There were no signs of instability or hazards identified relative to either pond. Minor erosion rills were observed on the inslopes of both ponds (noted as non-substantial). The East pond is in need of cleaning; the Permittee has initiated this but completion is not expected until the material can dry in the spring. Mr. White performed the required P.E. certification of the reports on the same day as the inspection (12/21/2012).

4.d Hydrologic Balance: Water Monitoring

There is no water monitoring required during the operational period. Quarterly monitoring will be resumed during the first year of reclamation of the site. One ground water well has been installed on the east side of the permit area. There was no discharge from either sediemnt pond during the fourth quarter of 2011.

21. Bonding and Insurance

The current general liability insurance remains in effect through October 1, 2012.
