**1. Permits, Change, Transfer, Renewal, Sale**

**3. Topsoil**

The Permittee has recently received a "conditional approval" to replace the silt fence located about the base of the west side topsoil pile (located immediately east of West Pond) with an earthen berm ( "... a minimum height of 1 foot"). Clean copies are required prior to final approval of Task ID # 4089.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

Mr. Edwards conducted the first quarter 2012 impoundment inspections for the East and West sediment ponds on March 13, 2012. No sign of erosive action or unstable embankments were reported. The open channel spillways which report treated runoff through the south permit boundary were reported as in good condition (they have never flowed). As observed on May 14, both ponds are dry; the spillways are in good condition. The inlets appear capable of functioning as designed.

**20. Air Quality Permit**

The access from the County road through the gate and to the office had recently been watered to control dust (May 8) . As observed on May 14, several applications of water had been made to the operational roads and pads throughout the site. Any dust created by incoming or outgoing trucks is controlled on site.

**21. Bonding and Insurance**

The current general liability insurance is in effect through October 1, 2012.

**22. Other**

Prospective buyers have been evaluating the site.
