4.a Hydrologic Balance: Diversions

The Permittee is in the process of having all of the ditches redefined. The contractor, Nielson Construction, has asked the Permittee to have the site "blue staked" to identify all utility lines to prevent problems.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The East and West ponds were both inspected. The East pond had a recent water depth of about 4 feet, but this had dropped about 3 feet, as observed during today's inspection. The open channel spillways were capable of functioning, as were the inlet culverts and ditches. The pond bottom in the west pond was saturated; no water volume was observed.

4.d Hydrologic Balance: Water Monitoring

Monitoring of the single ground water well is not required until reclamation of the site is initiated.

4.e Hydrologic Balance: Effluent Limitations

Neither pond was close to the discharge elevation.

9. Protection of Fish, Wildlife and Related Environmental Issues

No wildlife was observed within or over the permit boundary.
