## **ADMINISTRATIVE OVERVIEW**

BRC Wellington, LLC  
Wellington Dry-Coal Cleaning Facility  
C/007/0045  
Carbon County, Utah

December 30, 2013

### **PROPOSAL**

The Wellington Dry-Coal Cleaning Facility Permit currently held by Covol Engineered Fuels, LC will be transferred to the BRC Wellington, LLC.

### **BACKGROUND**

The Division was contacted by COVOL in July of 2004 regarding plans to install a coal cleaning and blending facility near the city of Wellington. Initially, the Division considered this site to be a coal loading facility not “in connection with” a mine and did not require the site to be permitted under the SMCRA regulations. Later as more information became available, it was apparent that this site was conducting physical processing of coal and thus was a surface coal mining operation. On March 17, 2006, Mary Ann Wright, Associate Director at the time, issued a determination to permit the COVOL site under the Surface Mining Control and Reclamation Act. COVOL was required to submit an application to permit the site; however on April 3, 2006 they appealed the decision to the Board of Oil, Gas & Mining. On October 18, 2006 COVOL and the Division filed a “Stipulation and Joint Motion for Continuance” to attempt an amicable resolution of the matter. It was agreed that permitting the site would be advantageous to both parties. COVOL proceeded to post a reclamation bond on the site and commence the permitting process. On January 15, 2008, the Division received an application to permit the COVOL facility. On March 15, 2008 the application was determined to be administratively complete. Public notification, through the Sun Advocate, occurred from April 1, 2008 to April 22, 2008. No public comments were received. The review process consisted of the Division identifying deficiencies in the application and the applicant (COVOL) providing responses. Numerous meetings were held to discuss the results. COVOL provided additional information on October 15, 2008, October 30, 2008, March 30, 2009, and July 13, 2009. Finally on August 18, 2009 the last submittal was made which incorporated all of the updates made throughout the review process and the application was considered to be complete and accurate.

An OSM-AVS recommendation was requested on August 20, 2009, which indicated that an outstanding violation was connected to the applicant through Jim Walter Resources Inc. in Alabama. After contacting the Alabama Surface Mining Commission and COVOL regarding this violation, it was determined that COVOL had nothing to do with the violation issued to Jim Walters Resources and should not be blocked from obtaining a permit. See correspondence from Carla D. Lightsey, Alabama Surface Mining Commission dated August 26, 2009.

On May 2, 2013 the Division approved an application to change the Operator of the Wellington Dry-Coal Cleaning Facility to Bowie Refined Coal, LLC.

A transfer application that will assign the permit to BRC Wellington, LLC was received on July 31, 2013 and approved December 30, 2013. Bowie Refined Coal, LLC will remain as the Operator.

### **PUBLIC NOTICE**

The applicant published notice for the permit transfer on August 1, 8, 15 and 22, 2013 in the Sun Advocate. No comments, objections, or requests for informal conference were received by the Division during the 30-day comment period.

### **AVS CHECK**

A review of the AVS system was conducted on December 30, 2013. The system showed that there were no outstanding violations for Covol Engineered Fuels, LC or BRC Wellington, LLC. BRC Wellington, LLC is clear to receive a permit.

### **RECOMMENDATION**

The Division made the decision on December 30, 2013 to approve the permit transfer on the fact that 1) The terms and conditions of the existing permit are being satisfactorily met; 2) The present coal mining and reclamation operations are in compliance with the environmental protection standards of the State Program; 3) The transfer does not substantially jeopardize the operator's continuing ability to comply with the State Program on existing permit areas; and 4) The operator has provided evidence of having liability insurance and a performance bond which will be in effect for the operation and will continue in full force and effect.
