Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The wash plant was active receiving coal from the Old Cottonwood refuse pile. It is possible that this site will be operational a longer period of time in 2017 that it has been in 2016.

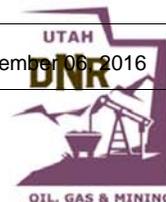

No pictures were taken due to battery issues with this camera.

1. Permits, Change, Transfer, Renewal, Sale

There are no permitting actions with the Division at the current time.

2. Signs and Markers

I inspected the identification sign and it meets the requirements of the R645 Coal Rules at the Bowie Refined Coal facility.

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm.

4.a Hydrologic Balance: Diversions

I inspected diversions and culverts throughout the property. They were open and would function as designed during a storm event. The structures were recently re-graded and clean out of sediment.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future except for the mine site sediment pond. This pond discharges regularly. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

4.d Hydrologic Balance: Water Monitoring

Water monitoring information is taken by the permittee and is sent electronically to the Division in Salt Lake City. This information is reviewed and analyzed by the Division staff. A report is written. The permittee was in compliance with the UPDES permit for the third quarter.

8. Noncoal Waste

The property was clear of non-coal waste materials such as oil, trash and grease cans.

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem.

16.b Roads: Drainage Controls

I inspected the road diversions and culverts throughout the property. They were functioning as design.
